- Good protection against a wide range of chemicals
- High puncture resistance
- Excellent grip
- Nitrile coating
- Comfortable yet durable
- USFDA Compliant
- Washable

DESCRIPTION

This 65 cm long glove, made from dipped nitrile over a cotton liner, protects the hand and arm.

As well as providing comfort and feel, its thin nitrile coating offers good protection against a wide range of chemical substances. Its rough finish ensures excellent grip.

An elastic band holds it firmly on the arm.

This glove is both thin and tough, allowing precision work to be carried out even in the most demanding conditions.

Its antibacterial treatment provides greater hygiene. Can be washed at 40°C using a neutral detergent.
