ORDER CODE

64021

DESCRIPTION:

Glove is made from composite fibre containing Dyneema® and offers maximum level 5 cut resistance. The blue thread provides good visibility to aid compliance. Elasticated wrist ensures a secure fit.

Preferred for the meat industry due to its feel combined with its maximum cut resistance.

WASHING INSTRUCTIONS:

It is recommended that gloves are washed and sanitised using the following method:

- ✓ Wash all visible contamination from the gloves.
- ✓ Soak overnight in quaternary ammonia sanitiser
- ✓ Thoroughly rinse sanitiser out of the gloves before use.

WARNING:

These gloves should not be used in conjunction with moving, serrated objects. Note that these gloves are cut resistant NOT cut proof. There will be some situations where a chainmesh glove will be preferred, especially where there is a risk of stabbing.
