Cool, Comfortable, Safe, Durable

Cool Protection for Hot Welders.

ProChoice Protective Welding gear utilises Pyrovatex® flame retardant cotton developed by Ciba Geigy.

Pyrovatex® is one of the world's leading flame retardant finishes on 100% cotton fabrics. It is widely used throughout Europe for industrial garments and is considered superior to other flame inhibitors.

Utilising lightweight, cool, cotton instead of heavy, hot alternatives makes sense in Australian conditions.

Pyromate protective wear by ProChoice protects welders from radiation, heat, and impact from flying sparks, metal spatter, and slag chips produced during welding, brazing, soldering, and cutting. Pyrovatex® fabric will not ignite, melt or drip or otherwise expose the skin of the wearer. Australian Standards Certified.

[PYRO MATE]

Pyromate welding hood.

Maximum spark protection in cool cotton with drawstring hood closure.

Pyromate welding jacket.

Treated cotton bodied vest with chrome leather sleeves. Fitted with convenient, internal mobile-phone pocket, and standard pocket. Velcro front closure for easy opening and closing.

[PYRO MATE WELDING GEAR]
