FEATURES AND BENEFITS

High Level Protection	The ProPlug Bell range is approved to AS/NZS 1270:2002, and offer protection for noise levels to 110dB(A) making them suitable for general and industrial use.
Superior Design	The bell shape uses an optimal design for correct fit and user comfort. This is easier to insert and reduces the tendency for the plug to back out of the ear. The smooth, soil-resistant polyurethane prevents dirt build-up.
High Visibility	This range of corded and un-corded earplugs and the refill pack, come in Fluro Yellow for high visibility and worker compliance.
Individually Packaged	Each pair is packaged in individual poly bags for hygiene

HEARING LOSS PREVENTION

Easy prevention measures, including hearing protection, avert permanent and debilitating hearing loss.

Hearing loss due to industrial noise is one of the most widespread, yet preventable work place injuries. Significant, irreversible hearing loss can occur after being subjected continually to noise from machinery, day-to-day activities, tools and traffic.

Research and development by ProChoice has resulted in hearing protection devices that offer the most effective protection available.
