StingaTM
Glove

ProChoice Stinga Gloves

SAFE AS.

The Stinga and Stinga 360° (fully dipped) glove range provides the ultimate in bare hand technology. They have a firm, comfortable fit that will enhance the dexterity of the wearer.

This seamless 100% apparel grade nylon glove is coated on the palms with a specially formulated PVC foam for enhanced gripping power in wet and dry conditions. This makes the Stinga one of the most versatile gloves available.

Features and Benefits

Bare Hand Technology	Provides increased dexterity, control and comfort making it perfect for a huge range of applications.
100% Apparel Grade Nylon	This is the highest grade nylon and gives the user more control. It is also latex free which is excellent for those with latex allergies.
PVC Foam Coating	Provides water repellency, comfort and enhanced gripping power in wet and dry conditions. PVC coating offers similar wear and abrasion resistance to nitrile, but has one major added benefit - many types of glue will not adhere to it. This makes gloves with PVC coating ideal for wood working and many other glue-related jobs. Also great for automotive assembly and trim applications, as glue won't stick to the PVC surface.
Palm Dipped	Provides enhanced breathability for wearer.
Fully Dipped	Provides full hand protection making it perfect for wet or oily conditions.
Seamless 15 gauge shell	This is a thicker, stronger and tighter knit giving a second skin feeling rather than that of wearing a glove.
Multipurpose	This glove is an excellent rigger alternative.
Sizes	Available in sizes 7 - 11

Industry Applications

There are many industries where Stinga Gloves would be a welcome asset:

- Wood Working
- Construction
- White Goods
- Shipping and Assembly
- Horticulture and Agriculture
- Light Fabrication
- Automotive Manufacturing
- Petroleum Industry
- Small Parts Handling
- Equine Industry
