Superior strength with better puncture and chemical resistance.

Finger textured to enhance grip in wet and dry conditions.

Thinner gauge improves tactile sensitivity.

Beaded cuff for easy donning.

Ambidextrous and non-sterile.

Applications include medical examination, chemotherapy, dental care, diagnostic & laboratory, home care.

### Quality Standards:

Conforms to ASTM D6319-00a standards.

Manufactured in accordance with ISO 9001 : 2008 and ISO 13485 : 2003 Quality Management Systems.

Biocompatibility tested (ISO 10993).

## Snell Nitrile Blue Powder Free Glove

### Product Specifications:

Length (typical): 240 - 250mm

Width (typical):

Small	85 - 86mm
Medium	95 - 96mm
Large	105 - 108mm
Extra Large	115 - 117mm

Thickness - single wall:

Fingers	0.11 - 0.12mm
Palm	0.08 - 0.09mm
Cuff	0.06 - 0.07mm

### Physical Properties:

Ultimate Elongation (typical):

Before Aging	550 - 580%
After Aging	530 - 560%

Force at Break (typical):

Before Aging	7 - 8N
After Aging	7 - 8N

Tensile Strength (typical):

Before Aging	23 - 26MPa
After Aging	24 - 28MPa

Glove Powder-Free Residue Content (typical): 0.40 - 0.55mg

Recommended Shelf Life: 3 years upon manufactured date
