

Chemical Absorbent Pads

Quickly and effectively absorbs liquid chemicals including acids and alkalis.

- SpillTech® Chemical Absorbent Pads are constructed from melt-blown polypropylene with a low-linting outer layer and dimpled for additional durability.
- Chemical Absorbent Pads will quickly absorb all liquid chemicals including acids and alkalis while maintaining their structural integrity.
- SpillTech® Chemical Absorbent Pads come in a carton with a perforated panel that is easily removed to turn the carton into a convenient benchtop dispenser.
- Designed of use on land only as they will absorb water on contact.
