

Oil Only Absorbent Socks

Contain and absorb oil, fuel and petroleum based solvent spills with SpillTech® Oil Only Absorbent Socks.

- SpillTech® Oil Only Absorbent Socks are constructed from polypropylene that quickly and effectively absorbs fuels such as petrol, diesel and bio-diesel, petroleum based solvents, vegetable oils and other non-water soluble liquids while repelling water.
- Available in 1.2m and 3m lengths, SpillTech® Oil Only Socks are an essential part of any spill kit or spill response trailer.
- Oil Only Absorbent socks are typically used to stop spills from spreading and allow spilled liquids to pool behind the socks making clean up quicker and easier.
- Socks can be over lapped to make an effective barrier and provide responders with time to clean up the remaining spill.
- SpillTech® Oil Only Absorbent Socks repel water while absorbing fuels and oils and as such can be used effectively in the rain or other wet areas. For use on water we recommend the SpillTech Floating Oil Booms.

Product Variations:

- 1.2m Oil Only Absorbent Sock:

Code: ASOS1.2
Dimensions: 7cm (dia.) x 1.2m (L)
Absorbency: 6L
Carton Qty: 10

- 3m Oil Only Absorbent Sock:

Code: ASOS3
Dimensions: 7cm (dia.) x 3m (L)
Absorbency: 15L
Carton Qty: 4
