- Unit: Box
- Size: M, L, XL
- Material: Vinyl
- Colour: Blue
- Non Sterile
- FDA
- CE

Product Details

Don't let contamination ruin your final product. Do you currently use Blue Vinyl gloves and have metal detectors for your end product? Probably you are already using metal detectable plasters and other items. Then you should be using these. These unique, premium quality, metal detectable vinyl gloves provide the ultimate in safe food handling. They are blue in colour so they are easily identifiable in product. They are powder free to avoid contamination and they are thick - 5 mil so that they last and won't fall apart. They are detectable by readily available metal detectors in the electromagnetic range 50Khz to 1Mhz ensuring that a small torn piece will not contaminate or end up in final product in compliance with FDA21 CFR170-199. Detectability is only a 1.5mm sphere.

Features and Benefits

- Contamination proof gloves
- Blue gloves
- Powder-free to avoid contamination
