

IPNZ PRODUCT RANGE

IPNZ Item	IPNZ Description
PFS0012	1850mm x 300M x 100µm Top Sheet

Properties			
Measurement	Unit	Target	Test Method
Colour		Clear	
Gauge	µm	100 (+/- 5µm)	Thickness Gauge
Film Width	mm	1850 (+/- 10mm)	Measuring Tape
Roll Length	M	300	
Roll Weight	kg	50.00 (+/- 3%)	Electronic Scale
Core size ID	mm	77	
Rolls per pallet	ea	16 (800kg)	
Pallets		2050 x 925mm Pallet	
Packaging & Labelling		Labels placed on the roll and inside the core containing item and batch information. Rolls placed on cradles, and strapped securely to the pallet.	
Storage		Film should be stored in a well-ventilated area out of direct sunlight and near ground level at a cool ambient temperature between 0-20°C.	
Product Stewardship and Recyclability		<p>Industrial plastics waste companies and recyclers can collect this material for recycling where enough clean PE film is available.</p> <p>This stretch film is code 4 for New Zealand recycling purposes.</p> <p>Cardboard cores can be recycled by Industrial recyclers if film and tape is removed.</p> <p>Cardboard layer pads and wrapping used as packaging on the pallet can be recycled using typical recycling channels.</p>	
Food Contact		This film is intended for use as secondary and tertiary packaging material not in direct food contact.
