

3M™ Versaflo™ S-Series Headcovers & Hoods

Technical Data Sheet

Description

The 3M™ Versaflo™ S-Series Headcovers and Hoods combine respiratory protection with head, or head, neck and shoulder coverage. The headtops are designed to be used with an approved 3M™ air delivery unit to form a respiratory protective device.

Features

- All S-Series headtops:
 - Meet the highest respiratory performance requirements when used with specific 3M™ air delivery units.
 - Have reduced curvature visors for reduced reflections and glare and excellent field of view.
 - Offer improved comfort, low air flow noise and reduced fogging.
 - Connect via the, strengthened BT-Series breathing tubes.
- Integrated head suspension headcovers and hoods (S1333, S-333, S-433, S-533):
 - Ready to use out of the box.
 - Most models available in two adjustable sizes Small and Large to comfortably fit more users than previous models.
 - Exhalation panel vents the headtop.
- Premium reusable suspension hoods (S-655, S-657, S-757- S-855):
available on certain Hoods, please see Ordering Information for model and code.
 - Adjustable head circumference and crown size straps to comfortably fit more users than previous models.
 - Optional size reducing comfort pad for improved fit.
 - External airflow adjustment control.

Applications

The S-Series headtops can be used with an air-filtering unit to form a powered air respirator system or with air regulating valve to form a supplied air respirator system. According to the system chosen, protection is provided against:

- Particles e.g. fine dusts, mists and metal fume.
- Gases & vapours.
- Particles & gases combined.

Typical industries include:

- Medical and Healthcare (Non patient)
- Pharmaceutical Manufacturing
- Agriculture
- Food and Beverage
- Pulp and Paper Processing
- Surface Preparation and Coating
- Chemical Industry
- Woodworking

Compatible with

PAPR

Continuous Flow Supplied Air

Integrated Suspension S-Series

S-133S/S-133L

Head and face coverage. Integrated Comfort suspension. General purpose fabric.

S-333SG/S-333LG

Head and face coverage. high durability. Integrated comfort suspension. Soft durable, low linting fabric for user comfort.

S-433S/S-433L

Head, face, neck and shoulder coverage. Integrated suspension.

S-533S/S-533L

Head, face, neck, and shoulder coverage. Integrated suspension. Durable, soft, low-linting fabric that drapes more comfortably over the wearer

Premium Head Suspension

S-655

Head, face, neck and shoulder coverage. Its respiratory seal is a comfortable, knitted inner collar that is shorter and thinner than previous models. General purpose, cost-effective fabric

S-657

Similar to S-655. The S-657 uses a double shroud design for its respiratory seal; wearers can select their preferred seal design. The S-657 is worn by tucking the inner shroud into a shirt or protective coverall, allowing excess air to be channelled over the body

S-757

Similar to S-657 but with a fabric specifically intended to help capture paint overspray, minimizing the potential for paint to flake off the wearer and onto the work piece. Fabric has an internal film barrier to help prevent paint contact with skin or clothes

S-855

Similar to S-655 but made with Kappler® Zytron® 200, a polypropylene fabric with a multi-layer barrier film. Features sealed seams, making it suitable for environments where certain liquid splash hazards may be present. Includes a comfortable inner collar

Standards

The S-Series headtops, when used as part of an 3M™ Respiratory system have been shown to meet AS/NZS 1716:2012.

The S-Series headtops meet the performance requirements of Australian/New Zealand Standards AS/NZS 1716:2012:

- when connected to the 3M™ TR-800, TR-600, TR-300+
- when connected to the 3M™ Air Regulating Valve or 3M™ Vortex™ Regulators.

Limitations

- In atmospheres containing less than 19.5% oxygen
- Confined spaces (lack of ventilation)
- When the risk is considered to be immediately dangerous for life or health (IDLH)
- If connected to, TR-300+, TR-600 and TR-800 Turbo units, not for use if the concentration of gas/vapour contaminant is above 10 times the Exposure Standard
- If connected to, TR-300+, TR-600 or TR-800 Turbo units, not for use if the concentration of particulate contaminant is above 50 times the Exposure Standard
- When connected to a continuous flow airline system with an Air Regulating Valve or Vortex regulator, AS/NZS 1715 states these systems have a Required Minimum Protection Factor of 100+ against all contaminants.

Specifications

Minimum Protection Factor	10 for gas/vapour when connected to TR-600 and TR-800 turbo units. 100+ when connected to 3M™ Air Regulating Valve or 3M™ Vortex Regulators. 50 for particulates when connected to 3M™, TR-300+, TR-600 & TR-800 Turbo units.	
Minimum Manufacturer Design Flow (MMDF)	150 l/min	
Storage conditions	-30°C to +50°C < 90%RH	
Operating temperature	-10°C to +55°C.	
Weight (without breathing tube):	S-133S = 100g S-333SG = 125g S-433S = 130g S-533S = 170g S-655 = 310g S-757 = 315g	S-133L = 110g S-333LG = 130g S-433L = 135g S-533L = 185g S-657 = 310g S-855 = 375g

Materials

- Headtop fabric (see table below for information)
- Visor (S-133/433/655/657/757) - PETG (S-333G/533/855E) - Polycarbonate
- Visor peel-offs - Polyester
- Integrated suspension headcovers and hoods:
 - Head suspension - Polyethylene
 - Air inlet – Polypropylene
- Premium reusable suspension hoods:
 - Head suspension – Polyethylene
 - Air channels – Polypropylene
 - Air inlet – ABS
 - Visor attachment clips – Nylon
 - Airflow adjustment cover - Nylon
- Comfort pad – Nylon scrim upper / polyurethane foam
- Size reducing comfort pad – Nylon scrim upper / polyurethane foam / nylon scrim lower

Note: For disposal, plastic and fabric parts can be quickly removed and separated for segregated waste streams, where facilities are available.

Model	Headtop Fabric	Exhalation panel fabric	Elastic/ Collar material
S-133S/L & S-433S/L	Spun bond polypropylene laminated to polypropylene film	Spun bond polypropylene	Nylon/ elastane face seal
S-333SG/LG & S-533S/L	Polyurethane coated knitted nylon	Spun bond polypropylene	Nylon/ elastane face seal
S-655	Spun bond polypropylene laminated to polypropylene film	N/A	Knitted cotton yarn/ elastic collar
S-657	Spun bond polypropylene laminated to polypropylene film	N/A	Nylon/ elastane elastic
S-757	Spun bond polypropylene laminated to both sides of polypropylene film Inner Shroud: Spun bond polypropylene	N/A	Nylon/ elastane elastic
S-855	Spun bond polypropylene with Kappler Zytron 200 multi-layer barrier - has sealed seams	N/A	Elastic collar material is knitted polyester

Note: S-655, S-657 & S-757 are premium hoods with reusable suspensions.

Natural Rubber Latex	Does not contain components made from natural rubber latex						

*Refer to catalogue sections for further information on each product and country availability

- 1) Weight is complete assembly (hood plus head harness). Use of optional size reducing pad with the S-600, 700, 800 series will add approx. 6 g (0.2 oz.) to the overall weight.
- 2) Consult S-Series User Instructions for detailed sizing guidelines, charts and optional sizing pads.
